WEI-WEI HUANG

Email: weihuang0213@gmail.com Phone: +886 909-155-366

EDUCATION

Feng Chia University Taichung, Taiwan
Bachelor of Artificial Intelligence Technology and Application 09. 2023 - Present

- GPA: 4.2 / 4.3 (Ranked 2/49)
- SKILLS:Python, C#, Swift, HTML/CSS, JavaScript, Machine Learning, Deep Learning, CNN, LSTM, Image Processing, PyTorch, OpenCV, Scikit-learn, Unity, SQLite.

PROJECTS & RESEARCH EXPERIENCE

Automated Detection and Analysis System for Porous Image Data 02.2025 - 01.2026

- Developed an automated image processing system for porous structure analysis.
- Applied U-Net segmentation models to improve image recognition accuracy.
- Integrated image preprocessing, model training, and analysis pipelines.

Fire Detection System Combining Time-Series Lightweight Model 02.2026 - Present

- Developed a lightweight real-time fire detection system based on a two-stage framework.
- Combined image processing techniques with CNN and LSTM models for fire detection.
- Improved continuous image recognition stability and reduced computational cost.
- Independently completed model design, training, and system development.

Mold Generation and Analysis System for Automated Mold Design 09.2025 - Present

- Developed an automated plastic injection mold design platform.
- Utilized 3D CAD geometry analysis and demolding direction detection.
- Generated visualized mold results and analyzed demolding directions.
- Responsible for system programming and web development.

AWARDS & COMPETITIONS

- 2025 Mediatek AI for Social Good Accelerator Program Action Award Innovation Seed Track
- 2024 Sustainable Smart Innovation Hackathon Honorable Mention
- Ministry of Education Digital Humanities Talent Development Program Humanities Award Honorable Mention
- 3rd IDEATHON Digital Innovation Competition
- Academic Excellence Award 4 times

PUBLICATIONS

- Presented at the 21st International Conference on Intelligent Information Hiding and Multimedia Signal Processing IIHMSP 2025.
- Image-Based Porosity Analysis of Acoustic Mesh Structures Using Advanced Digital Image Processing Techniques

ACTIVITIES & PARTICIPATION

- Course Assistant, MOE Digital Humanities Smart Navigation Project 10.2025 - 01.2026
- Practical Research Project Assistant for Integrating Generative AI and RPA Programming Courses 12.2025
- Kagoshima Prefecture Japanese Language Overseas Training Program 07.2024
- SCI Switzerland International Volunteer Workcamp 07.2025
